DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 16 October 2008 has been entered.

Claims 1, 3-11, 13, 17, 20-21, 24-26, 30, 43-61 are pending.

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Attorney Daniel Y. J. Kim on 21 October 2008.

The application has been amended as follows:

In The Claims

Claims 14-16 (cancelled).

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The instant application is deemed to be directed to a nonobvious improvement over the invention of Makino (U.S. Publication No. 2004/0077385), in view of Inubushi (U.S. Patent No. 6,064,453).

With respect to the independent claims **1, 6, 30, and 43**, the nonobvious improvement comprises a rib formed at an opening portion of the upper cover, wherein a buffering member comprises a first buffering member disposed between an inner surface of the upper cover and an upper surface of the sub display, and a second buffering member disposed between the inner surface of the upper cover and at least one of a side surface or the upper surface of the sub display, wherein a lower surface of the second buffering member contacts an upper surface of the sub-display module, as substantially described and connected with the other functional language recited in these claims.

With respect to the independent claims **21, 24, and 26**, the nonobvious improvement comprises a buffering member disposed between at least a portion of the upper cover and the sub display and configured to prevent an external force applied to the upper cover from being transmitted to the display module, wherein the upper cover comprises a protrusion portion which extends upward from a circumferential surface of an opening portion of the upper cover; and a first reinforcing member disposed at an inner surface of the protrusion portion of the upper cover and configured to reinforce a strength of the protrusion portion of the upper cover, wherein the first reinforcing

member is integrally adhered to the upper cover at the time of fabrication of said upper cover, as substantially described and connected with the other functional language recited in these claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
